

## **AUDREY ROBILLARD BIOGRAPHY**

Dr. Audrey E. Robillard, an educator for 38 years, with the Broward County School Board. She has held many positions in the district and has worked in mostly underprivileged schools from elementary to high. Her focus on helping shape the lives of the children to become better human and lifelong learners has been her highest educational achievement.

She is an accomplished educator, former Broward School District Administrator, and a goal-oriented professional. Dr. Robillard maintains high educational standards, communicates clear goals, develops school staff, and creates a culture that centers on teaching, learning, and the needs of every child and family.

Not only does she possess and meet the professional eligibility for the high levels of educational positions including former assistant director to the South Area Superintendent, but as a dedicated childcare director for one of the most effective and high-quality pre-schools in Broward County, she is adept at delivering effective child development results focusing on child development and growth. Please consider my strengths for the opportunity to share my years of experience with your organization, and the opportunity to oversee the development, implementation, and evaluation of the program and services that support the mission, vision, and strategic goals of the school district community she serves.

She has shown 38 years of improving student achievement and maintaining and expanding communication between the school and all stakeholders, and diverse experiences in monitoring, processing, training, and supervising personnel in both urban and suburban schools.

Programs that she has created to assist her school community include:

- Designed and implemented effective Mommy/Daddy and me activities and field trips to enhance student and parent on and off-campus lifelong learning experiences.
- Activities to cultivate and develop the five domains and promote early family literacy required by the state's educational standards. (Such as strategic planning and setting curricular goals).
- Wrote and were awarded several Donors Choose Grants to promote family literacy.
- Worked with community agencies and My Safe Harbor community partner to provide donations, materials, and supplies for struggling teen moms and infants. A few months ago, when all avenues were closing in on parents to secure baby formula for their infants, she could solicit dozens of cans of formula through her community connections and partners for the teen parents in her school.
- She has shared hundreds of materials with other childcare programs and community organizations, serving underprivileged youths or homeless children whenever there is a surplus of donated items in her program.
- Developed several successful community outreach projects and events.
- Volunteer for several programs and organizations in the community.

- Collaborated with vocational schools and SBBC childcare programs to provide training and internships for students taking Allied Health, Teacher Assistants, Paraprofessional Training Program, and child development courses. These student interns receive an industry certificate or state certification at the completion of the program and can join the workforce while enrolled in high school or upon graduation.
- Honoree, **100 Outstanding Women of Broward County, Boys and Girls Club.**
- Author: An Exploratory Study of the Perception and Experiences of Selected Educators on the Infusion of Multicultural Education into the Language Arts Curriculum in Broward County, Florida, Public Schools (Dissertation, FAU, 1999).
